Aim

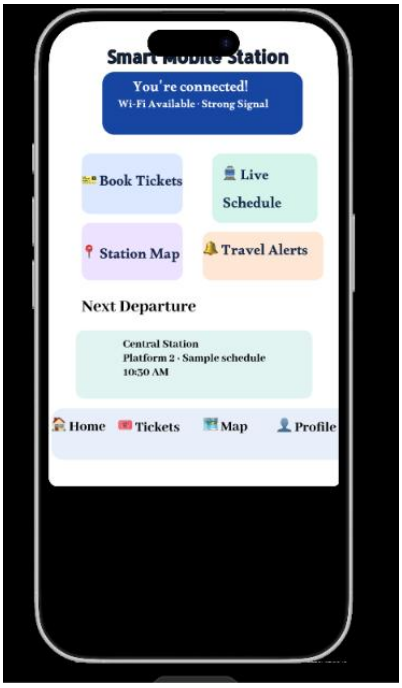

To design a user interface prototype for a Smart Mobile Station application using Figma, focusing on connectivity, convenience, ticket booking, and live train schedule information.

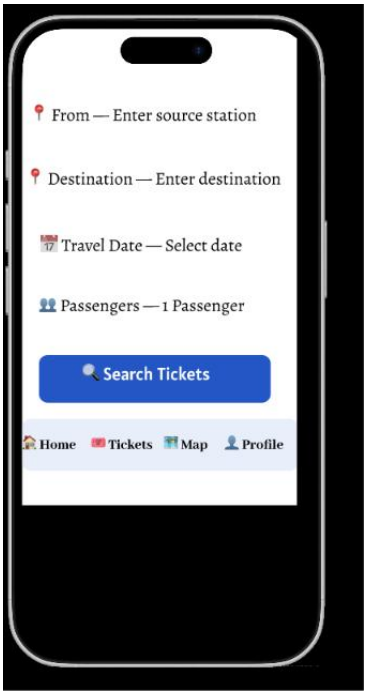

Procedure

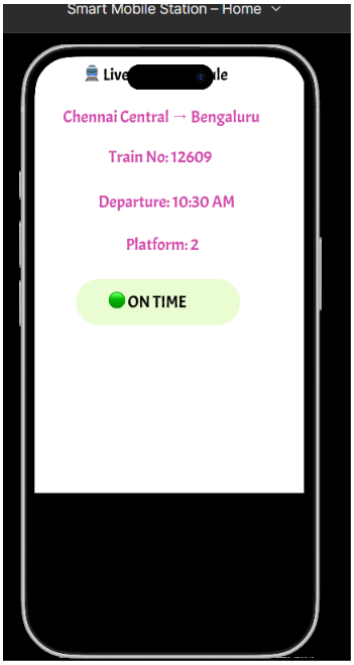

1. Open Figma and create a new design file.
2. Create mobile phone frames using the Frame tool.
3. Design the Home Screen with the app title, Wi-Fi connectivity status, colorful service cards, next departure details, and bottom navigation.
4. Design the Book Your Ticket screen with source, destination, travel date, passenger details, and a Search Tickets button.
5. Design the Live Train Schedule screen with train details, departure time, platform number, and train status.
6. Apply suitable colors, text styles, rounded rectangles, and emojis to improve the interface.
7. Open the Prototype tab and connect the Book Tickets card to the ticket booking screen using On tap → Navigate to.
8. Connect the Live Schedule card to the live schedule screen using the same interaction.
9. Click the Present button to preview and test the prototype.

Screenshot

Result

A Smart Mobile Station user interface prototype was successfully designed in Figma with three screens: Home, Book Your Ticket, and Live Train Schedule. The prototype demonstrates convenient access to connectivity information, ticket booking, and train schedules through interactive navigation.
